

Instructions:

After you have watched the video on 12 and 24 hour time you can watch the two links below that show how we convert 12 to 24 hour time. Remember when we are writing 24 hour time we do not need to write am or pm for example:

3:00 am is just 3:00 and 3:00 pm is just 15:00. The simplest way to calculate 24 hour time is to just add 12 onto the initial number- $3 + 12 = 15$. Remember we only add 12 to time from 1pm onwards.

After you have watched all three videos you can complete one of the worksheets.
